PROFILE

Self-motivated and reliable Information Technology student at the University of Central Florida, headed toward a Master's in Cybersecurity. I learn by building real systems, testing them until they hold up, and then attacking them to see what breaks. Seeking an internship where I can keep doing that.

EDUCATION

University of Central Florida, Orlando, Florida

Aug 2023 - Present

Bachelor of Science in Information Technology, expected May 2027. Cumulative GPA: 3.054

Wellington High School, Wellington, Florida

2019 - 2023

High School Diploma. Cybersecurity Choice Program all four years (4.0 throughout) and DECA Marketing and Business Program all four years. Co-founder and Vice President of the school Car Club.

PROJECT

TradeHQ: automated crypto trading research system (private repository)

In progress

Python 3.12, FastAPI, WebSockets, Streamlit, SQLite, NumPy, Pydantic, Docker Compose, GitHub Actions, pytest, Hypothesis, Playwright; Coinbase and Kalshi APIs

- Building a Python system in five stages (two complete, a third in progress) that automates Coinbase accumulation with cost-basis and P&L tracking, paper-trades 16 Kalshi 15-minute markets, and sends phone alerts.
- Kalshi engine computes its own fair probability from a lognormal model and trades only the gap to the market price. It must pass a statistical go-live gate (bootstrap confidence intervals on expected value and a random-entry placebo test), and a separate auditor recomputes P&L to the cent.
- Every order passes through a single risk layer with a kill switch. CI runs secret scanning (gitleaks) and dependency audits (pip-audit) with hash-pinned dependencies; the dashboard is bound to localhost with private remote access over Tailscale.
- Runs as three Docker Compose services with a Streamlit dashboard, a live terminal, a SQLite journal, and restore-tested encrypted nightly backups. Final stage: a full red-team of my own system, documented as a cybersecurity case study.

EXPERIENCE

Front of House Employee, Cafe-Boutique Piano, Winter Park, Florida

May 2025 - Present

- Manage reservations and seating for parties of varying sizes in a fast-paced fine dining environment, and give food, beverage, and wine recommendations based on guest preferences.
- Take and serve orders, process payments, and record all table activity on Clover POS.
- Track inventory of consumables such as wine and napkins, handle opening and closing duties, and resolve guest concerns professionally.

Server, Park Avenue Barbecue, Wellington, Florida

Mar 2023 - Aug 2023

- Greeted and seated guests, took orders, made menu recommendations, and coordinated with kitchen staff for accurate, timely delivery.
- Processed payments and resolved guest concerns professionally.

Construction Laborer / Equipment Operator, Wellington King Enterprises, Punta Gorda, FL

May 2021 - Aug 2021

- Operated equipment, assisted with site preparation, and hauled dirt and materials while following safety procedures.

SKILLS AND CERTIFICATIONS

Coding languages: Java, C, Python, JavaScript, C++, SQL, HTML and CSS

Security and IT: SIEM concepts, IAM / Active Directory fundamentals, NIST and security frameworks, PowerShell

Systems and networking: Windows 10/11, Linux, basic Cisco networking concepts, TCP/IP fundamentals

Tools: Docker, GitHub Actions, AWS Cloud, Microsoft Office Suite, Clover POS

Certifications: Microsoft Technology Associate (MTA): IT Fundamentals; MTA: Windows Operating System Fundamentals

HONORS AND ACTIVITIES

- Palm Beach County Career and Technical Student of the Year (2023)
- DECA: International qualifier and three-time Florida State qualifier in Entrepreneurship
- Cambridge AICE Diploma; National Honor Society; National Society of High School Scholars (NSHSS)
- 2nd degree black belt in Chito Ryu (Top Flight Martial Arts) after more than six years of training
